

## Version 1.35 Summary

### Maintenance

- When assigning equipment onto a contract the User will be warned if the equipment is already assigned to another contract.
- Asset Detail values may now be associated with a New Equipment Number format.

### Inventory

- An Additional inventory filter is available for Technician Teams.
- A total showing the number of records is now displayed above the grid.
- A new field 'SW Version' is available within the grid to display the software version numbers of any associated software.
- When adding equipment if the User selects an Asset Detail which is associated with a Next Equipment Number format it will automatically generate an equipment number using this format.
- When a User scraps an item of equipment a scrap template may be produced.

### Jobs

- A total showing the number of records is now displayed above the grid.

### Service History

- Service History reports for individual items will now display totals for:
  - Total Number of Jobs
  - Total Cost of Parts
  - Total PPM Labour Cost
  - Total Call-Out Labour Cost
  - Total Cost
  - Total Time / Total Estimated Time
  - Total Down Time
