

Version 1.40 Summary

Procurement Module

- New Procurement Module (Ref: F0066349)

Templates

- Attachments Fast Path (Ref: F0098627)

Service History

- 'Mark Job as Complete' checkbox added to the 'Service History' screen when updating via the 'Logged Calls' screen. (Ref: F0100560)
- The auto-population of the Completed Date/Time may be switched off. Please contact us at barwick.support@ascribe.com if you would like this setting to be amended. (Ref: F0098887)

Maintenance

- Hospital, Department, Equipment Type, Model No and Product Code merge fields are available within the Barcode Module (Ref: F0093338)

BUG Fixes

- Stock Filters. After adding/editing a record on the Stock Levels Maintenance tab, if you return to the Stock Maintenance tab inactive records are displayed (even if the show inactive checkbox is not checked). (F0097348/F0097352)
- Contract Equipment View - Excel button not anchored correctly when the Contract Equipment View is maximized. (F0099274)
- Contract Equipment View - Cost Centre/Code is using the new 10 characters cost centre/code field lengths. (F0099275)
- Enhance Company letters and inventory hints (F0099259)
- Manuals Maintenance - Include a prompt for the user as to whether to produce the template when adding/editing manual details. (F0099301)
- Contract Equipment View - Location field is not displaying correctly due to filters on the table. (F0099507/F0099510)
- Tech Team Maintenance - When moving Technicians between teams only move calls that are allocated to technicians rather than to a team (F0109760/F0099862)

- Merged Companies fix where a company has previously been merged with another company (F0100630/F0100640)
- Inventory Attachments – if the attachments tab has not been viewed then the program does not recognise that there are any attachments (F0101308/F0101329)
